Fables And Futures Biotechnology Disability And The Stories We Tell Ourselves Mit Press By George Estreich

As Estreich shows, each new application of biotechnology is accompanied by a persuasive story—one that minimizes downsides and promises enormous benefits. In this story, people with disabilities are both invisible and essential. A key promise of new technologies is that disability will be repaired or prevented.

"persuasion Human Improvement And Disability A Talk From April 29th, 2020 - In this talk, award-winning poet and memoirist Gee Estreich will draw from his new book *Fables and Futures* Biotechnology Disability and the Stories We Tell Ourselves. From Francis Galton's *Essays in Eugenics* to the announcement of the first gene-edited babies, the dream of human improvement has been entwined with..."
